

Certified Blockchain Architect

How Blockchain is different from Traditional Technologies?

Traditional Architecture

Blockchain Architecture

Properties Difference

Properties	Blockchain Services	Traditional Services
Operations	Only Insert Operations	C.R.U.D Operations
Replication	Full Replication of block on every peer	Master-Slave or Multi-Master
Consensus	Peers agree on the outcome of transactions	Distributed Transactions
Invariants	Anyone can validate the transactions over the network	Integrity Constraints

Characteristics Difference

Characteristics	Advantage
Disintermediation	Blockchain
Confidentiality	Traditional
Robustness	Blockchain
Performance	Traditional
Audit Trail	Blockchain
